On , gain Solar Energy.

On , based on your HEAT:

If : deal 1 dmg.
If : deal 2 dmg.
If : prevent 2 dmg.
If : prevent 3 dmg.

SOLAR ENERGY

Special Feature **Max: 10 energy**

Absorb the energy of the Sun to power up.

The amount of Solar Energy you have absorbed changes abilities based on your current amount of heat, represented by the four colors here.
Check the state of this meter when abilities reference "your HEAT"

When gained, Solar Energy can move the dial past 10, continue to zero, and keep counting. Whenever this occurs, *(dial passing the 10>0 threshold)* gain *Energized state* .

BLAZE

Negative Status Effect **Stack limit: 2**

A dangerous game, playing with fire.

During their Upkeep Phase, a player with this token rolls 1 die:
On 1-4, Sunspot gains 1 Solar energy
On 5-6, that player receives 3 isolated dmg and removes that token.

ENERGIZED STATE

Overlay

Increase energy gain and power when in full solar form.

When you gain *Energized State* place the center overlay over your board, changing your ultimate and giving you a powerful passive.

HERO SETUP
At the beginning of the game place your solar status effect disk over the 0-10 "dial" so that the 2 is visible. Set the center overlay aside.
